

DIY Dog Gate Plans

Supplies

(3) 1x3x8
Glue
1-1/4" pocket screws
Hinges 2" x 1-3/8"

Tools

Miter Saw
Drill
Kreg jig

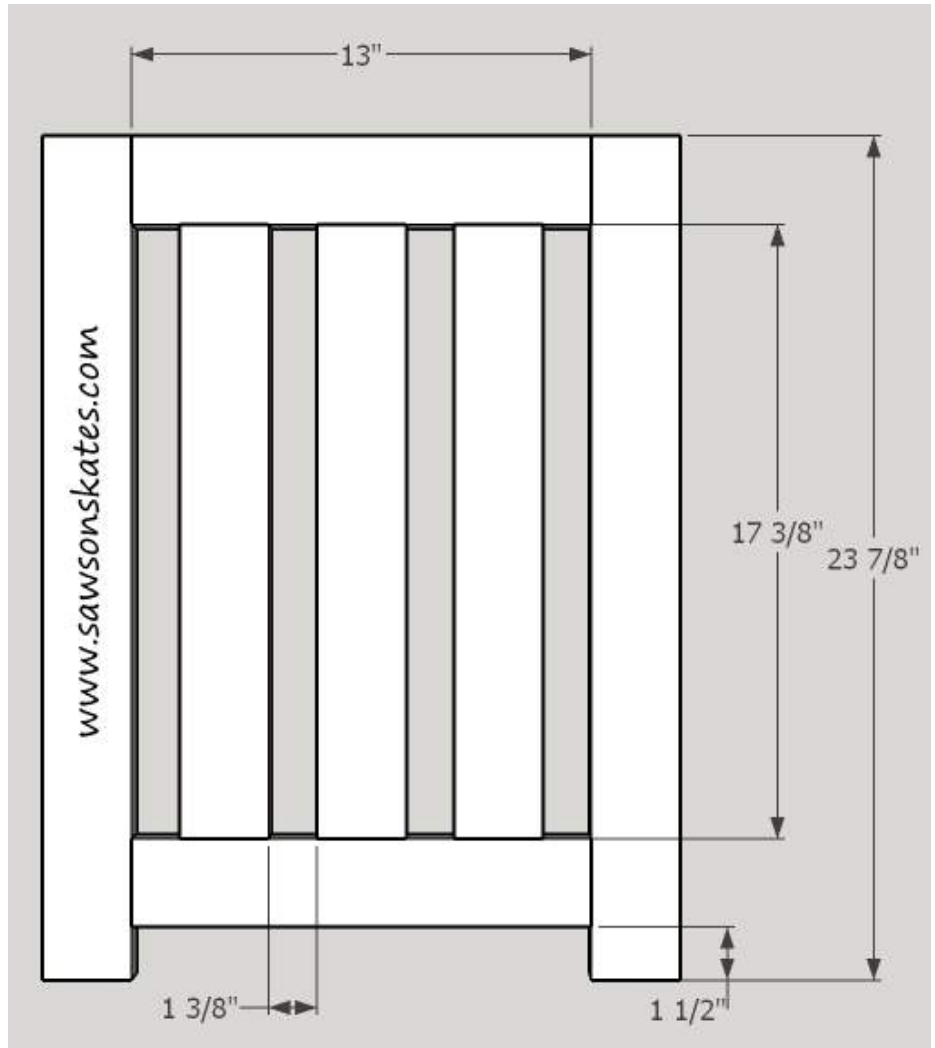

Step 1. Cut 4 legs to 23-7/8".

Step 2. Cut 4 rails to 13" and drill pocket holes in each end.

Step 3. Cut 6 slats to 17-3/8" and drill pocket holes in each end.

Step 4. Optional: to assist with the alignment of the slats, rip a piece of scrap to 1-3/8" and cut into 8 pieces.

Step 5. Layout one gate section (with the pocket holes facing up) according to the diagram above. If you cut the scrap in Step 4, you can use it to evenly space the slats. Apply glue to the ends of the slats and the top/bottom rails, clamp and attach using 1-1/4" pocket screws. Repeat for the other section.

Step 6. Attach the hinges.

Step 7. Paint/stain to finish.
